The most complete nutrition and fitness software

If you're not using nutrition software, you're shortchanging yourself and your clients. How? By working too hard.

By taking too long. By charging too much. By serving too few clients. And by delivering work that is less accurate or thorough than you know it should be. I'm Ed Prestwood, and my company developed NutriBase Clinical Nutrition and Fitness software. We think our software can positively affect your bottom line.

The big question isn't "Should I use nutrition software?" but "Which nutrition software should I use?" I want you to know that NutriBase is the most complete nutrition software package you can buy. Why? To start with, only NutriBase provides Palm PDA support for you and your clients... only NutriBase provides professionally developed Meal Plans - free for downloading when you need them... the industry's most flexible nutrition report generator... the right to install onto multiple computers... royalty-free intake software for your clients... assessment reports... cookbook publication support... integrated backup and restore... and a database published in over 2 million nutrition information books.

Investment precedes dividends. With NutriBase, that investment isn't a penny more than what you'd pay for the Food Processor or Nutritionist Pro - our closest competitors. Yet we don't charge you fees of \$150 to \$300 *per year* for continued product support. And our tech support comes with a toll-free number - Hey, it isn't *free tech support* if you have to pay for the call!

Judge for yourself. I don't expect you to take my word for all of this, but I do hope you'll take just a moment to get your facts firsthand. Please visit us at www.nutribase.com. Read the Today's Dietitian article "Nutrition Software: 101 Questions to ask *Before* you Buy." Check our 150-feature comparison chart of the top three nutrition software products for RD's. Review our free, downloadable Meal Plans. Look at what NutriBase has to offer, then follow our links to visit our competitors on the Web. Then make a comfortable, informed decision about which package will do the most for you. :-)

GET THE FACTS... BUY INFORMED... DON'T BE SORRY!
